State	17,433	16,622	-4.7%	230	239	3.9%

Definitions and Calculations:

- Client totals are unduplicated across areas; i.e., State is unduplicated across the state, Rural is unduplicated across the rural centers, etc.
 - Clients can receive multiple services and where applicable are duplicated.
 - Greyed/empty cells represent client counts below 20 and are removed for privacy. Zeros are shown.
 - Supported employment includes # of clients with a supported employment status anytime during the fiscal year.
 - Supported Housing includes # of clients that received that service anytime during the fiscal year (DSAMH service code #174).
 - Jail Services and In-Home Services includes # of clients who received services with a location code of Jail or In Home.
 - Employment includes # of clients who were employed or did not stay unemployed during the fiscal year.
 - % Employed includes # of clients employed (full time, part time, or supported employment) divided by the number of clients in the workforce. Workforce includes clients who are employed (full time, part time or supported employment) and/or unemployed but seeking work.
- *Estimate of Need— Substance Abuse and Mental Health Services Administration. Substate Estimates of Substance Use and Mental Disorders from the 2016-2018 National Surveys on Drug Use and Health: Results and Detailed Tables. Rockville, MD

Red: Minimum requirements not met.

Grey/empty: Client Count is less than 20 and too low to display. A zero count is displayed.

Orange: Median number of days/hours or utilization percentages are below 75% or above 300% of the rural or urban median or utilization totals

Utilization: Percent of all clients receiving services. Total Outpatient number of clients served is an unduplicated count by provider of any client receiving an outpatient service.

Median Length of Stay: Median length of time for all clients who received that service. Median is the middle value in a list of numbers.

Average Length of Stay: Average length of time for all clients who received that service. Average or mean is the total number of time for that service divided by the number of clients receiving that service.

Inpatient includes MHE service code 170

Residential includes MHE service codes 171 and 173

Medication Management includes MHE service codes 61

Psychosocial Rehabilitation includes MHE service codes 70, 80, 100, and 160

Case Management includes MHE service code 120 and 130

Respite includes MHE service code 150

Assessment includes MHE service code 22 Diagnosis and Assessment

Testing is not shown on the scorecard but is included in Total Outpatient

Treatment Therapy includes MHE service codes 30 Individual Therapy, 31 Electroconvulsive Therapy, 35 Individual Behavior Management, 40 Family Therapy, and 50 Group Therapy

Total Outpatient includes all MHE service codes except those reported on the same day as a bed day (170 Inpatient, 171 Residential, and 173 Residential Support)

Emergency includes all service codes with emergency indicator set to "yes."

Peer Support services includes MHE service codes 130 Peer Support.

State Hospital data used to calculate utilization, median and average number of days in the state hospital during the fiscal year only.

Data for services provided in Jail are not included.

Client Outcome Measures

Definitions and Calculations:

^ Discharge includes clients who have been discharged in the current year or have not received any events of service for at least 7 months.

Valid OQ Clients Served exclude clients who received assessment and testing only and clients served while in Jail.

Percent of Clients Participating: Minimum requirement is 50% or more.

Clients and Episodes are included if there are 2 or more valid administrations per instrument where one or more was administered within the fiscal year.

Deteriorated: Clients who have had a *Clinically Significant increase in symptoms from intake.

Improved: Clients who have had a *Clinically Significant reduction in symptoms from intake.

Recovery: If a client's score drops below the empirically derived cutoff between clinical scores and community normative scores and there has been *Clinically Significant change, then the client is classified as recovered.

Clinically Significant: calculated using the instrument's Reliable Change Index (RCI) and cutoff score, which together define standards for clinically significant change achieved during mental health treatment. The RCI is the amount by which a client's total score must increase (deterioration) or decrease (improvement) from intake to be considered clinically significant. Changes in the total score that are less than the RCI are not statistically relevant (i.e. no change).

Outcomes are not calculated until there has been reliable change within a given instrument. Outcomes; Improved, Stable, Recovered, and Deteriorated are calculated by episode.
